Sample #: 25C03644391 (51084079)  
Senders Sample ID: N/A  
Source: Whole blood / 2 tubes  
Testing Indications: Screening, Routine  
Signs & Symptoms:  
Specimen Note:

Date Collected: 2025-03-25  
Date Onset:  
Date Received: 2025-03-28  
Date Reported: 2025-03-29  
Patient Setting: Clinic/Community

Test	Result	Date Approved
------	--------	---------------

HIV-1/HIV-2 Ag/Ab Combo Screen	Non-Reactive	2025-03-29
HIV Interpretation	Non-reactive for HIV-1 p24 antigen and HIV-1/HIV-2 antibodies.	2025-03-29

Note: For high-risk exposures, repeat HIV testing at 3 weeks and, if negative, at 6 weeks after possible exposure, or on presentation of symptoms compatible with acute HIV infection.

Syphilis Antibody Screen	Non-Reactive	2025-03-29
Syphilis Serology Interpretation	No serological evidence of current or past infection.	2025-03-29

Note: No confirmatory testing is performed on samples with non-reactive screening results. If not done already, repeat syphilis serology testing is recommended in 4 weeks for individuals suspected of syphilis infection or re-infection.
