Date of Birth: [REDACTED] Sex: Female

Sample #: 26C03912701 (54477013)
Senders Sample ID: NA
Source: Whole blood / 2 tubes
Testing Indications: Routine
Signs & Symptoms:
Specimen Note:

Date Collected: 2026-03-30
Date Onset:
Date Received: 2026-04-03
Date Reported: 2026-04-06
Patient Setting: Clinic/Community

Test	Result	Date Approved
HIV-1/HIV-2 Ag/Ab Combo Screen	Non-Reactive	2026-04-06
HIV Interpretation	Non-reactive for HIV-1 p24 antigen and HIV-1/HIV-2 antibodies.	2026-04-06

Note: For high-risk exposures, repeat HIV testing at 3 weeks and, if negative, at 6 weeks after possible exposure, or on presentation of symptoms compatible with acute HIV infection.

Syphilis Antibody Screen	Non-Reactive	2026-04-06
Syphilis Serology Interpretation	No serological evidence of current or past infection.	2026-04-06

CT-GC-TV

Specimen Source	URINE
Collection Date	Apr 1, 2026 12:00AM
Collection Time	15:08
Chlamydia	NEGATIVE
Gonorrhea	NEGATIVE

Testing performed using a Health Canada approved Nucleic Acid Amplification Test (NAAT). A negative result indicates that nucleic acids from the target pathogen are absent or below the detection limit of the assay, whereas false positive results may occur in patients with a low pre-test probability of infection (e.g. asymptomatic screening). Consider repeat testing if result does not correlate with patient history and/or clinical presentation.

HEPATITIS C INVESTIGATION

Hepatitis C Antibody	NOT DETECTED
